

# SelexION® 离子淌度技术 发表文章目录

## SelexION® 离子淌度技术发表文章目录

1. Integrated, Step-Wise, Mass-Isotopomeric Flux Analysis of the TCA Cycle. Cell Metab 2015, doi:10.1016/j.cmet.2015.08.021, 影响因子: 18.164 (代谢流分析)
2. Electrospray Ionization Mechanisms for Large Polyethylene Glycol Chains Studied Through Tandem Ion Mobility Spectrometry. J Am Chem Soc 2014, DOI: 10.1007/s13361-014-0885-0, 影响因子: 13.858 (聚乙二醇链分析)
3. Direct metabolomics for plant cells by live single-cell mass spectrometry. Nature protocol 2015, doi:10.1038/nprot.2015.084, 影响因子: 12.423 (靶向代谢组学)
4. Argininosuccinate synthetase regulates hepatic AMPK linking protein catabolism and ureagenesis to hepatic lipid metabolism. PNAS 2016, doi:10.1073/pnas.1606022113, 影响因子: 9.661 (腺嘌呤类)
5. DIFFERENTIAL MOBILITY SPECTROMETRY/MASS SPECTROMETRY HISTORY, THEORY, DESIGN OPTIMIZATION, SIMULATIONS, AND APPLICATIONS. Mass Spectrom Rev 2015, DOI: 10.1002/mas.21453, 影响因子: 9.526 (离子淌度综述)
6. Differential Mobility Spectrometry Coupled with Multiple Ion Monitoring in Regulated LC-MS/MS Bioanalysis of a Therapeutic Cyclic Peptide in Human Plasma. Anal Chem 2016, DOI: 10.1021/acs.analchem.5b04408, 影响因子: 6.32 (环肽分析)
7. Differential Mobility Spectrometry-Driven Shotgun Lipidomics. Anal Chem 2014, doi:10.1021/ac5021744, 影响因子: 6.32 (脂质组学)
8. Probing Electrospray Ionization Dynamics Using Differential Mobility Spectrometry: The Curious Case of 4-Aminobenzoic Acid. Anal Chem 2012, doi:10.1021/ac301529w, 影响因子: 6.32 (4-氨基苯甲酸)

9. Optimization of a Differential Ion Mobility Spectrometry-Tandem Mass Spectrometry Method for High-Throughput Analysis of Nicotine and Related Compounds: Application to Electronic Cigarette Refill Liquids. *Anal Chem* 2016, DOI: 10.1021/acs.analchem.6b01241, 影响因子: 6.32 (尼古丁及相关化合物)
10. Rapid Characterization of Naphthenic Acids Using Differential Mobility Spectrometry and Mass Spectrometry. *Environ Sci Technol* 2014, doi:10.1021/es501821h, 影响因子: 6.198 (环烷酸)
11. Three-dimensional enhanced lipidomics analysis combining UPLC, differential ion mobility spectrometry, and mass spectrometric separation strategies. *J Lipid Res*, 2014, DOI 10.1194/jlr.D051581, 影响因子: 4.81 (脂质组学)
12. Characterization of acyl chain position in unsaturated phosphatidylcholines using differential mobility-mass spectrometry. *J Lipid Res* 2014, DOI 10.1194/jlr.M046995, 影响因子: 4.81 (不饱和磷脂酰胆碱酰基链位置)
13. Structural identification of triacylglycerol isomers using electron impact excitation of ions from organics (EIEIO). *J Lipid Res* 2015 DOI 10.1194/jlr.M070177, 影响因子: 4.81 (甘油三酯异构体分析)
14. Differential mobility spectrometry as an orthogonal separation to LC-ESI-MS/MS for quantification of isomeric cerebrosides in plasma and cerebrospinal fluid. *J Lipid Res* 2018, doi: 10.1194/jlr.D089797, 影响因子: 4.81 (脑脂苷元分析)
15. Differential Mobility-Mass Spectrometry Double Spike Isotope Dilution Study of Release of  $\beta$ -Methylaminoalanine and Proteinogenic Amino Acids during Biological Sample Hydrolysis. *Sci Rep* 2018, DOI:10.1038/s41598-017-18392-w, 影响因子: 4.122 ( $\beta$ -甲基氨基丙氨酸和常见氨基酸分析)
16. A Role for Mitochondrial Phosphoenolpyruvate Carboxykinase (PEPCK-M) in the Regulation of Hepatic Gluconeogenesis. *J Biol Chem* 2014, doi:10.1074/jbc.C113.544759, 影响因子: 4.01 (靶向代谢)

17. Development of a quantitative method for four photocyanine isomers using differential ion mobility and tandem mass spectrometry and its application in a preliminary pharmacokinetics investigation. *J Chromatogr A* 2018, doi:10.1016/j.chroma.2018.09.048, 影响因子: 3.716 (福大赛因抗癌光敏剂异构体分析)
18. Selective Quantitation of the Neurotoxin BMAA Using Hydrophilic Interaction Liquid Chromatography-Differential Mobility Spectrometry-Tandem Mass Spectrometry (HILIC-DMS-MS/MS). *Anal Bioanal Chem* 2015, DOI: 10.1007/s00216-015-9012-8, 影响因子: 3.307 (神经毒素BMAA)
19. A sensitive and selective LC-differential mobility-mass spectrometric analysis of allopregnanolone and pregnanolone in human plasma. *Anal Bioanal Chem* 2013, doi:10.1007/s00216-013-7391-2, 影响因子: 3.307 (孕酮类)
20. Confirmation of diosmetin 3-O-glucuronide as major metabolite of diosmin in humans, using micro liquid chromatography mass spectrometry and ion mobility mass spectrometry. *Anal Bioanal Chem* 2013, DOI 10.1007/s00216-013-7237-y, 影响因子: 3.307 (香叶木素代谢物)
21. Separation and simultaneous quantitation of PGF<sub>2</sub>  $\alpha$  and its epimer 8-iso-PGF<sub>2</sub>  $\alpha$  using modifier-assisted differential mobility spectrometry tandem mass spectrometry. *Acta Pharm Sin B* 2018, doi:10.1016/j.apsb.2018.01.011, 影响因子: 3.223 (手性药物)
22. Differential mobility spectrometry tandem mass spectrometry with multiple ion monitoring for the bioanalysis of liraglutide. *Anal Bioanal Chem* 2017, Doi:10.1007/s00216-017-0431-6, 影响因子: 3.2 (利拉鲁肽)
23. Differential mobility spectrometry followed by tandem mass spectrometry with multiple ion monitoring for bioanalysis of eptifibatide in rat plasma. *Anal Bioanal Chem* 2018, DOI 10.1007/s00216-017-0431-6, 影响因子: 3.2 (依替巴肽)
24. Performance enhancement in the measurement of 5 endogenous steroids

- by LC-MS/MS combined with differential ion mobility spectrometry. Clin Chim Acta 2015, doi: 10.1016/j.cca.2014.07.036 , 影响因子: 2.926 ( 类固醇类 )
25. Extracts of *Coreopsis tinctoria* Nutt. Flower Exhibit Antidiabetic Effects via the Inhibition of  $\alpha$ -Glucosidase Activity. J Diabetes Res 2016, doi:10.1155/2016/2340276 , 影响因子: 2.885 ( 党参花提取物 )
  26. Establishment of a Charge Reversal Derivatization Strategy to Improve the Ionization Efficiency of Limaprost and Investigation of the Fragmentation Patterns of Limaprost Derivatives Via Exclusive Neutral Loss and Survival Yield Method. J Am Soc Mass Spect 2018, doi:10.1007/s13361-018-1924-z, 影响因子: 2.869 ( 利马前列腺素 )
  29. A Unique Collision-Induced Dissociation Reaction of Cholamine Derivatives of Certain Prostaglandins. J Am Soc Mass Spect 2018, doi: 10.1007/s13361-018-2051-6 , 影响因子: 2.869 ( 利马前列腺素 )
  30. Description of Gas-Phase Ion/Neutral Interactions in Differential Ion Mobility Spectrometry: CV Prediction Using Calibration Runs. J Am Soc Mass Spect 2014, DOI: 10.1007/s13361-014-0934-8, 影响因子: 2.869 ( 方法学 )
  31. Decay Mechanisms of Protonated 4-Quinolone Antibiotics After Electrospray Ionization and Ion Activation. J Am Soc Mass Spect 2014, DOI: 10.1007/s13361-014-0972-2, 影响因子: 2.869 ( 喹诺酮衰变机理 )
  32. Understanding gas phase modifier interactions in rapid analysis by Differential Mobility-Tandem Mass Spectrometry. J Am Soc Mass Spect 2014, doi:10.1007/s13361-013-0808-5, 影响因子: 2.869 ( 方法学 )
  33. Determining the Binding Sites of  $\beta$ -Cyclodextrin and Peptides by Electron-Capture Dissociation High Resolution Tandem Mass Spectrometry. J Am Soc Mass Spect 2015, DOI: 10.1007/s13361-015-1118-x, 影响因子: 2.869 (  $\beta$ -环糊精与多肽的结合位点 )
  34. Differential Mobility Spectrometry for Improved Selectivity in Hydrophilic

- Interaction Liquid Chromatography-Tandem Mass Spectrometry Analysis of Paralytic Shellfish Toxins. *J Am Soc Mass Spect* 2017, DOI: 10.1007/s13361-017-1651-x, 影响因子: 2.869 ( 麻痹性贝类毒素 )
35. The Metabolic Factor Kynurenic Acid of Kynurenine Pathway Predicts Major Depressive Disorder. *Front Psychiatry* 2018, doi: 10.3389/fpsy.2018.00552, 影响因子: 2.857 ( 色氨酸代谢途径 )
36. Characterization of the Xiamenmycin Biosynthesis Gene Cluster in *Streptomyces xiamenensis* 318. *PLOS ONE* 2014, doi:10.1371/journal.pone.0099537, 影响因子: 2.766 ( 微生物代谢物分析 )
37. Differential mobility spectrometry combined with multiple ion monitoring for bioanalysis of disulfide-bonded peptides with inefficient collision-induced dissociation fragmentation. *Bioanalysis* 2017,9(2): 183-192, 影响因子: 2.478 ( 二硫键合肽 )
38. Comparison of enzyme kinetics of warfarin analyzed by LC-MS/MS QTrap and differential mobility spectrometry. *J Chromatogr B* 2016, doi:10.1016/j.jchromb.2015.11.036, 影响因子: 2.441 ( 杀鼠灵代谢物 )
39. A differential mobility spectrometry/mass spectrometry platform for the rapid detection and quantitation of DNA adduct dG-ABP. *Rapid Commun Mass Spectrom* 2013, doi:10.1002/rcm.6591, 影响因子: 1.97 ( DNA加合物 )
40. Study of field mobilities dependence and direct separation of acidic phytohormones by differential mobility spectrometry-massspectrometry. *Int J Mass Spectrom* 2014, doi: 10.1016/j.ijms.2013.12.025, 影响因子: 1.826 ( 酸性植物激素 )
41. Critical Comparison of Liquid Chromatography Coupled to Mass Spectrometry and Three Different Ion Mobility Spectrometry Systems on Their Separation Capability for Small Isomeric Compounds. *Chromatographia* 2019, doi:10.1007/s10337-018-3640-z, 影响因子: 1.401 ( 小分子异构体分析 )

42. Matrix Effects in Mass Spectrometry Combined with Separation Methods - Comparison HPLC, GC and Discussion on Methods to Control these Effects. Tandem Mass Spectrometry - Molecular Characterization. Doi:10.5772/55982 ( 克伦特罗, 基质效应研究 )
43. Comparison of the peak capacity for DMS filters with various gap height: experimental and simulations results. Int J Ion Mobil 2015, DOI 10.1007/s12127-015-0177-9 ( 方法学 )
44. Peak capacity in differential mobility spectrometry: effects of transport gas and gas modifiers. Int J Ion Mobil 2012, DOI 10.1007/s12127-012-0098-9 ( 不同类型离子淌度比较 )
45. Determination of Triazole derivative metabolites (TDMS) in Fruit and Vegetables using the UePPE methods and differential Mobility Spectrometry (DMS) and Survey of the Residue situation in Organic and conventional Produce. Aspects Food Control animal Health 2016 ( 三唑代谢物 )
46. Development of rapid methodologies for the isolation and quantitation of drug metabolites by differential mobility spectrometry - mass spectrometry. Int J Ion Mobil Spectrom 2012, doi:10.1007/s12127-012-0111-3 ( 药物代谢物 )
47. Differential mobility spectrometry with nanospray ion source as a compact detector for small organics and inorganics. Int J Ion Mobil 2013, DOI 10.1007/s12127-013-0135-3. ( 方法学 )
48. DMS-MS separations with different transport gas modifiers. Int J Ion Mobil 2013, DOI 10.1007/s12127-013-0130-8 ( 修饰剂影响 )

# 您的成功就是我们工作的动力 我们视为己任。

作为SCIEX的客户，您将得到世界一流的售后支持，无论在哪里，我们都将是您最为可靠的伙伴，为您解决难题，提供方案以及最大化提高工作效率。

我们的售后工程师提供全线LC-MS/MS系统支持。无论您的离子源，自动进样器或者实际样品分析需要帮助，您都将得到及时反馈。我们将最大努力保证仪器的正常使用，帮助您完成科研工作。

我们的应用科学家提供可靠的工作流程，帮助您简化样品制备，减少人工操作步骤。帮助您开发方法以提高分析通量。通过提供简单易用的iMethod™方法，帮助您快速开展工作。我们也可以通过电话实现远程支持。

我们的资深专家为您量身订做适合您实验室的培训课程，提高工作效率。您可以到我们的Demo Lab参加LC-MS/MS技术培训及应用课程，也可以通过网络 e-learning工具进行学习。

我们的售后支持团队随时为您提供最新产品信息，软件更新，分析方法及仪器维护，确保您在竞争中独占鳌头。

我们将竭尽所能为您提供高效优质的服务。
