Your LC-MS/MS Acquisition Software Just Got Better!

Discover a New Level of System Robustness

Top 3 Reasons Why You Should Upgrade to Analyst® Software 1.7

Optimize Precision and Capacity

Maximize the length of time between instrument cleaning and reduce mechanical disruption for greater productivity

The scheduled-ionization feature enables sustained instrument operation overtime periods, which can be at least 3X longer before required instrument cleaning. With this mode of operation, the ionspray voltage is turned on only when data collection is required.

In just one simple click and with minimal operator intervention, your lab's critical systems will benefit from increased long-term robustness. That means you can now run even more samples before routine instrument cleaning is required.

Save Time, Money and Hassle

Reduce cost and complexity of software license management

Analyst Software 1.7 offers concurrent ("server-based") licensing, which enables the administration of multiple users across the organization via one central platform. A concurrent use license is not locked to a single machine and, as such, can float on a network. Your IT department can empower an entire team with only the number of licenses that are expected to be in use simultaneously, as they will not require a license for every user.

Whether you have labs in one location or you have remote teams within the same time zone, with the use of concurrent licenses, you have the flexibility to grant and control user access.

Since fees are based on the maximum number of users or devices, which access the software at a time, you only buy what you need. Thus, concurrent licensing is also cost-effective and value for money.

Improve Security and Management

Worry less about system vulnerabilities and leverage on comprehensive built-in security protection of Windows

Analyst Software 1.7 is now compatible with Windows 10.

One operating system means better system integration within your organization. Your IT department can now easily streamline support and the resolution process.

Network Your Way to Success

## Discover What Makes the SCIEX Success Network Your Pathway to Answers

SCIEX**Now**™ Online

The SCIEX**Now Portal** is the *Everything, Anytime* destination for all your SCIEX support needs. You can keep track of activities that matter most to you and manage your lab in the most efficient way possible. Extensive self-help resources like our deep Knowledge Base, enable you to solve many problems on your own. SCIEX**Now is available 24/7** and your new SCIEX instruments are automatically added to your profile when you purchase.

SCIEX**University**

SCIEX**University** offers the most diverse and flexible learning options available, with best-in-class content that helps you to get the most out of your instrument and take your lab to the next level. **Available personalized learning paths based on the latest memory science** ensure better knowledge retention, and automated onboarding and enrollment means you'll get up and running faster.

SCIEX Service and Support

Our mission is to help you be successful, whether it's to repair your instrument, assist with your workflows, or help you maximize productivity in your lab. Whatever your challenge, global **SCIEX Service and Support** personnel are subject matter experts who are focused on mass spec and capillary electrophoresis, so **you'll be able to achieve your scientific goals quickly and efficiently.**

SCIEX Community

The **SCIEX Community** helps you move your science forward and **find the answers you need from SCIEX experts as well as your peers.** In the community, you can share and exchange ideas, protocols, stay up to date with the latest products, and receive support.

SCIEX Software Support

SCIEX Software combines best-in-class capabilities, comprehensive proactive support, services driven by innovation, and a commitment to promptly deliver the right solution to meet the various demands of your lab. With a Software Support plan, you will have the latest software, **so your instruments run at peak performance.**
