

We Are Now Windows 10 Compatible

Upgrade Your SCIEX
Capillary Electrophoresis Instruments Today

A Windows 10 upgrade is now available for the PA 800 Plus, CESI 8000 Plus and MDQ Plus, with enhancements to 32 Karat™ included in this upgrade package.

Microsoft intends to terminate Windows 7 support, leaving your PCs vulnerable to security risks. While your SCIEX CE systems will still function, they will stop receiving critical security updates and virus protection. Upgrading your SCIEX CE instruments to Windows 10 is EASY and will allow your lab continued, seamless support.

Make the Choice to Upgrade Today with our Package Benefits:

- Functional improvements and enhancements to 32 Karat software
- Maintain compliance with your internal IT
- Includes all current, tested methods for the PA 800 Plus Pharmaceutical Analysis System and CESI 8000 Plus (IgG, CHO, cIEF, SDS MW, Fast Glycan, Performance)
- Increased Data Security – Protect your SCIEX systems with the latest Microsoft security updates
- Trusted Installation – Upgrade includes a new controller with installation completed by SCIEX world class service team
- Cost Effective – Compatible with current and previous software reprocessing keys
