The X500R QTOF System
Powered by SCIEX OS

Productivity, accuracy, and simplicity—it’s what the SCIEX OS is all about
We knew what you were looking for in a mass spec system, and we delivered on all fronts, with extra focus on the software.

What we heard from you made it possible for us to engineer a superior system with a software solution that meets your needs and then some. Here are just some of the features built right in, and the benefits they deliver to you:

- **Everything you need all in one place**
  - Acquire, analyze, report-run the mass spec and perform full data review and analytics all within the same software solution.

- **Easy to learn and operate so you’re more productive**
  - A new thoughtfully designed user interface ensures faster learning and improved productivity.

- **No-worry sample queues**
  - The automated calibration feature seamlessly integrates mass calibration into your sample queues for rock-solid performance reliability.

- **Better system uptime with new tuning tools**
  - New service diagnostic and tuning tools allow for easy troubleshooting, maximizing your uptime.

**Acquisition**

- **Batch**
- **Queue**

**Processing**

- **Explorer**
- **Analytics**

**Management**

- **Configuration**
- **Library**
- **Event Log**
- **Users**
Process large compound lists—better, faster
Do it all better and faster with MRM and calibration displays, automated MS/MS library search and interpretation, and structural elucidation tools for unknowns.

Simple quant with confirmation for all your methods
Powerful new tools designed to deliver enhanced quantitative results from high-resolution MS data with included MS/MS library confirmation capabilities.
