

Consumables for 3 day quantitative analysis of pesticides in cannabis products at SCIEX

SCIEX training courses follow the proven spaced learning approach to maximize learning retention. The training process includes a blend of instructor-led training, hands-on exercises and self-paced eLearning provided at a SCIEX location. This course is focused on quantitative pesticide analysis in cannabis products using SCIEX Triple Quad and QTRAP instruments, and is intended for new SCIEX LC-MS instrument users working in the cannabis industry, or non-SCIEX users seeking a detailed overview of pesticide analysis in cannabis products.

The following consumables may be required at your own site after the training course to perform any lab exercises demonstrated during the training course.
