

SCIEX
The power of precision

Optimize your mass spectrometry system for peak performance with

Remote Instrument Optimization and Calibration

Keeping your SCIEX mass spec tuned and calibrated regularly reduces the risk of inaccurate analytical results, subsequent incorrect decisions, and potential waste and rework.

The power of proactive LC-MS system assessment

Leverage SCIEX specialists' expertise to prevent incidents before they cost you time and money.

The Remote Instrument Optimization and Calibration procedure, carried out by one of our certified field service engineers, at a time that suits your schedule:

- Evaluates system performance
- Ensures that the system parameters are properly optimized
- Confirms that the instrument is correctly calibrated

Benefits for your laboratory:

Peace of mind:

Move forward with projects, knowing your instrument is calibrated and performing well.

Expert assistance:

Make informed decisions with input from SCIEX expertise using remote tools.

Increased uptime:

Identify and resolve potential problems before they lead to a breakdown.

Cost efficiency:

Lower maintenance costs by reducing the need for on-site visits.

SCIEX
The power of precision

"Accuracy is crucial to your laboratory. SCIEX engineers have the expertise to optimize and calibrate your mass spectrometer correctly. The SCIEX Remote Instrument Optimization and Calibration service is a proactive and convenient way to achieve peak performance."

– Joel Blair, Sr. Global Product Manager, Service, SCIEX

What´s included?

- Optimization and calibration checklist
- System performance
- Inspection for front-end contamination
- Optimized system parameters and calibration

Combine instrument optimization and calibration with maintenance

You can add Remote Instrument Optimization and Calibration to your service agreement at any time or purchase it as a stand-alone product.
