# SAFETY DATA SHEET

GU - Glucose Ladder Standard

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1	.1	Pro	duo	ct i	den	tifier

Product name

: GU - Glucose Ladder Standard

**EC number** : 232-940-4

#### UK (GB) REACH Registration number

Registration number	Legal entity
Exempt from REACH: According to the provisions of Article 2(7)(a) and Annex IV of REACH	-

#### **REACH Registration number**

Registratio	on number	Legal entity	
Exempt from REACH: Acc of Article 2(7)(a) and Anne	<b>.</b> .	-	
CAS number	: 9050-36-6	•	
Product type	: Powder.		
Other means of identification	:		
Product part number	: B94508; 4776613		
Kit name	Carbohydrate Labe	can Labeling and Analysis Kit eling and Analysis Assay Kit ng and Analysis Kit	
Kit part number	: C30098 477600 B94499		
Chemical formula	: C18H32O16		
I.2 Relevant identified use	es of the substance or m	ixture and uses advised against	
Product use	: Research and Dev	elopment	
Area of application	: Professional applic	ations.	
Uses advised against			

#### 1.3 Details of the supplier of the safety data sheet

AB Sciex UK Limited 21F18, 21 Mereside, Alderley Park Macclesfield, Cheshire SK10 4TG United Kingdom Telephone no.: 00800 2255 2279

e-mail address of person : msds.inquiry@sciex.com responsible for this SDS

#### 1.4 Emergency telephone number

Date of issue/Date of revision

None identified.

: 16/09/2022 Date of pre

Date of previous issue

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

National advisory body/Poison Centre				
Telephone number	: CHEMTREC: +44 20 3807 3798			
<u>Supplier</u>				
Telephone number	: 1-877-740-2129 (8:30A PT - 5:00P PT)			

### **SECTION 2: Hazards identification**

Product definition	: Mono-constituent substance	
Classification according Not classified.	to UK CLP/GHS	
•	ed as hazardous according to UK CLP Regulation SI 2019/720 as amended. Ietailed information on health effects and symptoms.	
2.2 Label elements		
Signal word	: No signal word.	
Hazard statements : No known significant effects or critical hazards.		
Dressutionery statemen		

tical haza

#### 2.3 Other hazards

Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	:	PBT	Р	В	Т	vPvB	vP	vB	
		N/A	N/A	N/A	N/A	N/A	N/A	N/A	
Other hazards which do	:	May form co	ombustible d	ust concer	ntrations in a	air.			

Date of issue/Date of revision

not result in classification

### **SECTION 3: Composition/information on ingredients**

31	Substances	
<b>J</b> . I	oubstances	

: Mono-constituent substance

Product/ingredient name	Identifiers	%	Classification	Туре
Maltodextrin	REACH #: Annex IV EC: 232-940-4 CAS: 9050-36-6	100	Not classified. See Section 16 for the full text of the H statements declared above.	[1]

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

<u>Type</u>

[1] Constituent

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.</li> </ul>
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	<ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.</li> </ul>
Ingestion	: Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

#### 4.2 Most important symptoms and effects, both acute and delayed

#### **Over-exposure signs/symptoms**

Eye contact	: Adverse symptoms may include the following: irritation redness
Inhalation	: Adverse symptoms may include the following: respiratory tract irritation coughing
Skin contact	: No specific data.
Ingestion	: No specific data.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	: Treat symptomatically. Contact poison treatment specialist immediately if large
	quantities have been ingested or inhaled.

**Specific treatments** : No specific treatment.

### **SECTION 5: Firefighting measures**

5.1 Extinguishing media		
Suitable extinguishing	:	Use dry chemical powder.
media		In case of fire, use water spray (fog), foam, dry chemical or CO <sub>2</sub> .
Unsuitable extinguishing media	:	Do not use water jet.
5.2 Special hazards arising f	rom	the substance or mixture
Hazards from the substance or mixture	:	May form explosible dust-air mixture if dispersed.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: carbon dioxide carbon monoxide
5.3 Advice for firefighters		
Special protective actions for fire-fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

### **SECTION 6: Accidental release measures**

6.1 Personal precautions, pro	teo	ctive equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for	co	ntainment and cleaning up
Small spill	:	Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor.

#### SECTION 6: Accidental release measures

6.4 Reference to other	See Section 1 for emergency contact information.
sections	See Section 8 for information on appropriate personal protective equipment.
	See Section 13 for additional waste treatment information.

### SECTION 7: Handling and storage

#### 7.1 Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on

#### 7.2 Conditions for safe storage, including any incompatibilities

hygiene measures.

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)	
Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

```
Recommended monitoring
                               : If this product contains ingredients with exposure limits, personal, workplace
                                  atmosphere or biological monitoring may be required to determine the effectiveness
 procedures
                                  of the ventilation or other control measures and/or the necessity to use respiratory
                                  protective equipment. Reference should be made to monitoring standards, such as
                                  the following: European Standard EN 689 (Workplace atmospheres - Guidance for
                                  the assessment of exposure by inhalation to chemical agents for comparison with
                                  limit values and measurement strategy) European Standard EN 14042 (Workplace
                                  atmospheres - Guide for the application and use of procedures for the assessment of
                                  exposure to chemical and biological agents) European Standard EN 482
                                  (Workplace atmospheres - General requirements for the performance of procedures
                                  for the measurement of chemical agents) Reference to national guidance
                                  documents for methods for the determination of hazardous substances will also be
                                  required.
Date of issue/Date of revision
                                   : 16/09/2022
                                               Date of previous issue
                                                                                                 Version :1
                                                                          : No previous validation
```

5/12

### Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

GU - Glucose Ladder Standard

### **SECTION 8: Exposure controls/personal protection**

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

8.2 Exposure controls		
Appropriate engineering controls	Use only with adequate ventilation. If user operations generate dust, fumes, gas vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below ar recommended or statutory limits. The engineering controls also need to keep ga vapour or dust concentrations below any lower explosive limits. Use explosion-p ventilation equipment.	ny as,
Individual protection meas	<u>à</u>	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, be eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated cloth Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	
Eye/face protection	Safety eyewear complying with an approved standard should be used when a ris assessment indicates this is necessary to avoid exposure to liquid splashes, mis gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses w side-shields. If operating conditions cause high dust concentrations to be produc use dust goggles.	sts, vith
Skin protection		
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard sho be worn at all times when handling chemical products if a risk assessment indica this is necessary.	
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	k
Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	е
Respiratory protection	Based on the hazard and potential for exposure, select a respirator that meets th appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other importa aspects of use.	
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ens they comply with the requirements of environmental protection legislation. In sor cases, fume scrubbers, filters or engineering modifications to the process equipr will be necessary to reduce emissions to acceptable levels.	me

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

<u>Appearance</u>				
Physical state	: Solid. [Powder.]			
Colour	: White. Opaque.			
Date of issue/Date of revision	: 16/09/2022 Date of previous issue	: No previous validation	Version : 1	6/12

### **SECTION 9: Physical and chemical properties**

_		
Odour	1	Odourless.
Odour threshold	1	Not available.
Melting point/freezing point	1	Not available.
Initial boiling point and boiling range	:	Not available.
Flammability (solid, gas)	1	Not available.
Lower and upper explosion limit	:	Not applicable.
Flash point	:	Not applicable.
Auto-ignition temperature	1	Not applicable.
Decomposition temperature	1	Not available.
рН	1	Not available.
Viscosity	1	Not applicable.
Solubility(ies)	4	Not available.
Miscible with water	:	Yes.
Partition coefficient: n-octanol/ water	:	Not available.
Vapour pressure	1	Not available.
Evaporation rate	1	Not available.
Relative density	:	Not available.
Vapour density	:	Not applicable.
Explosive properties	:	Not available.
Oxidising properties	:	Not available.
Particle characteristics		
Median particle size	:	Not available.

9.2 Other information	
Physical/chemical properties comments	: No additional information.
comments	

### **SECTION 10: Stability and reactivity**

10.1 Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	:	The product is stable.
10.3 Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	:	Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation.

GU - Glucose Ladder Standard		
SECTION 10: Stability and reactivity		
10.5 Incompatible materials	:	Reactive or incompatible with the following materials: oxidising materials Reactive or incompatible with the following materials: acids and alkalis.
10.6 Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.
<b>SECTION 11: Toxicol</b>	lo	gical information
11.1 Information on toxicolog	jica	I effects
Acute toxicity		
<b>Conclusion/Summary</b>	:	Not available.
Acute toxicity estimates N/A		
Irritation/Corrosion		
Conclusion/Summary	:	Not available.
<u>Sensitisation</u>		
Conclusion/Summary	:	Not available.
Mutagenicity		
Conclusion/Summary	:	Not available.
<u>Carcinogenicity</u>		
Conclusion/Summary	:	Not available.
Reproductive toxicity		
Conclusion/Summary	:	Not available.
<u>Teratogenicity</u>		
Conclusion/Summary	:	Not available.
Specific target organ toxicit	y (s	single exposure)
Not available.		
Specific target organ toxicit	y (I	epeated exposure)
Not available.		
Aspiration hazard Not available.		
Information on likely routes of exposure	:	Not available.
Potential acute health effects		
Eye contact	1	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.
Inhalation	:	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.
Skin contact	:	No known significant effects or critical hazards.
Ingestion	:	No known significant effects or critical hazards.

#### Symptoms related to the physical, chemical and toxicological characteristics

### **SECTION 11: Toxicological information**

Eye contact	: Adverse symptoms may include the following: irritation redness
Inhalation	: Adverse symptoms may include the following: respiratory tract irritation coughing
Skin contact	: No specific data.
Ingestion	: No specific data.

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

<u>Short term exposure</u>		
Potential immediate effects	available.	
Potential delayed effects	available.	
Long term exposure		
Potential immediate effects	available.	
Potential delayed effects	available.	
Potential chronic health effe		
Not available.		
Conclusion/Summary	available.	
General	eated or prolonged inhalation of dust may lead to chronic respi	iratory irritation.
Carcinogenicity	known significant effects or critical hazards.	
Mutagenicity	known significant effects or critical hazards.	
Reproductive toxicity	known significant effects or critical hazards.	

**Other information** : Not available.

### **SECTION 12: Ecological information**

12.1 Toxicity	
<b>Conclusion/Summary</b>	: Not available.

### 12.2 Persistence and degradability

**Conclusion/Summary** : Not available.

### 12.3 Bioaccumulative potential

Not available.

### 12.4 Mobility in soil Soil/water partition

coefficient (Koc)Mobility: Not available.

: Not available.

### 12.5 Results of PBT and vPvB assessment

### Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

GU - Glucose Ladder Standard

SECTION 12: Ecological information								
Product/ingredient name	PBT	Р	В	Т	vPvB	vP	vB	
Maltodextrin	N/A	N/A	N/A	N/A	N/A	N/A	N/A	

**12.6 Other adverse effects** : No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

13.1 Waste treatment meth	ods
Product	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	<ul> <li>Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.</li> </ul>
Packaging	
Methods of disposal	<ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.</li> </ul>
Special precautions	: This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### **SECTION 14: Transport information**

	ADR/RID	ADN	IMDG	IATA
14.1 UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
14.2 UN proper shipping name	-	-	-	-
14.3 Transport hazard class(es)	-	-	-	-
14.4 Packing group	-	-	-	-
14.5 Environmental hazards	No.	No.	No.	No.

14.6 Special precautions for user

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to IMO instruments : Not available.

2

Date of issue/Date of revision

### **SECTION 15: Regulatory information**

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### UK (GB) /REACH

Annex XIV - List of substances subject to authorisation

#### Annex XIV

None of the components are listed.

#### Substances of very high concern

None of the components are listed.

#### Ozone depleting substances

Not listed.

#### Prior Informed Consent (PIC)

Not listed.

#### Persistent Organic Pollutants

Not listed.

## Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

Substances requiring : Not applicable. labelling

#### **Seveso Directive**

This product is not controlled under the Seveso Directive.

#### EU regulations

 Industrial emissions
 : Not listed

 (integrated pollution

 prevention and control) 

 Air

 Industrial emissions
 : Not listed
