

Required consumables for 1 day transition to SCIEX OS for SCIEX Triple Quad and QTRAP systems at customer site

SCIEX training courses follow the proven spaced learning approach to maximize learning retention. The training process includes a blend of instructor-led training, hands-on laboratory exercises and self-paced eLearning, provided at the customer site. Upon completion of the course, you should be comfortable with creating and optimizing SCIEX OS acquisition methods, performing data acquisition and quantitative data processing, and maintaining and troubleshooting your system.

For this training to be successful, the LC-MS/MS system must be installed and configured before the training. Table 1 lists the consumables that must be available for use during the training.
