# Now offering

# Windows 10 and 21 CFR Part 11

## Upgrade your GenomeLab GeXP system today.

**A Windows 10 upgrade is now available for the GenomeLab GeXP system with enhancements to the GeXP software package including 21 CFR Part 11 compliance tools.**

Microsoft has terminated Windows 7 support, leaving your PCs vulnerable to security risks. While your GenomeLab GeXP system will still function, it will stop receiving critical security updates and virus protection. Upgrading your GenomeLab GeXP system to Windows 10 is easy and will enable continued, seamless support with optional 21 CFR Part 11 compliance tools for your lab.

## Upgrade to Windows 10 today

- Take advantage of functional improvements and enhancements to the GeXP software package
- Maintain compliance with your internal IT landscape
- Get current applications for the GenomeLab GeXP system
- Increase your data security by protecting your SCIEX system with the latest Microsoft security updates
- Benefit from the new controller included in the upgrade with installation completed by the world-class SCIEX service team

## 21 CFR Part 11 tools to help you stay compliant

- Tools for compliance environments
- Controlled and secure user access
- Maintain an audit trail to capture the actions and events that occur on your system
- Authorize and sign-off on reports with digital signatures
